

## *Salmonella enteritidis*

By Lea Fitzpatrick, Oakcrest High School, Mays Landing, NJ

Your goal in this assignment is to research *Salmonella enteritidis* and create a children's mystery book that reflects your knowledge. The book should be informative as well as entertaining. Let your creativity and imagination shine! It should include the following items: title, several interesting characters, table of contents, pictures, reference page, and a glossary of important terms. The book should show your knowledge of what the bacteria is and what it can cause, symptoms of the disease and how it is diagnosed, and finally the treatment and prevention of the disease. You can use the resources below to start your search of knowledge. Feel free to use any other websites or outside

resources.
