If you are a medical, dental, or veterinary student interested in biomedical research, the Howard Hughes Medical Institute (HHMI) offers you an exceptional opportunity to spend a summer in an HHMI laboratory. The summer after your first or second year is an ideal time to engage in research with an outstanding HHMI scientist before making plans to pursue a year-long research training program.

**STUDENT PERSPECTIVES**

“Working with an HHMI investigator gave me access to incredible resources and allowed me to conduct meaningful research in a limited time frame. My summer experience motivated me to pursue a year of research in my mentor’s lab. Having the chance to be mentored by an influential and important scientist had a huge impact on my scientific perspectives and career decisions.”

**KATHLEEN COOK SUOZZI**
Medical Fellow, 2010

**ENGAGE IN RESEARCH WITH AN OUTSTANDING MENTOR** for 8-10 consecutive weeks and undertake a basic, translational, or applied biomedical research project.

**INCREASE YOUR SCIENTIFIC KNOWLEDGE AND RESEARCH SKILLS**, gain insight into a career as a medical scientist, and determine if you would like to continue your research training in a year-long program.

**LEARN FROM LEADING INVESTIGATORS IN YOUR FIELD OF INTEREST** and interact with world-class scientists in a rich training environment.

**FOR FURTHER PROGRAM INFORMATION** and application details, visit [www.hhmi.org/medfellowships](http://www.hhmi.org/medfellowships).

If you have any questions, please e-mail medfellows@hhmi.org.

**RECEIVE A SUMMER PAYMENT** of $5,000 for 10 weeks ($500/week if less than 10 weeks); and a relocation allowance of up to $1,000 if your research is at a fellowship institution other than your school.

**APPLY ONLINE**
